

Abiona Centre Statement of Commitment to Accessibility

At Abiona Centre, we are committed to treating all people in a way that allows them to maintain their dignity and independence. Building on the Centre's Accessibility Policy, we believe in integration and equal opportunity. We will continue to meet the needs of people with disabilities in a timely manner by preventing and removing barriers to accessibility, and meeting accessibility standards and requirements under the Accessibility for Ontarians with Disabilities Act, 2005 (AODA)

The Multi-year Accessibility Plan of the Centre outlines the policies and actions the Centre will implement to provide inclusive and accessible services to all its stakeholders.

The Centre is committed to making accessibility throughout the organization a reality. Many AODA initiatives are in full action, and more are on the way. We will continue to identify, fix and remove barriers to create accessible services for our internal and external clients.

We welcome any comments and suggestions for quality improvement and service delivery related to AODA compliance.
